Subject: **Twin Lakes – Ordinance Amendment**  
Boating Ordinance Review

Dear Village of Twin Lakes:

Thank you for submitting the villages amended ordinance language, more specifically titled as: *An Ordinance Amending Subsection 8.36.040 Of The Twin Lakes Code Of Ordinances Pertaining To Boating*

Wisconsin Statute 30.77(3)(d) requires that local regulations pertaining to the equipment, use or operation of boats on inland lakes shall be subject to advisory review and shall be submitted to the Department at least 60 days prior to final action. The purpose of the ordinance advisory review is to evaluate the proposed ordinance and identify any inconsistencies within chapter 30.77. The review also serves to provide consideration for all citizens potentially impacted by the proposed ordinance and to give an opinion or suggest changes to the ordinance to insure the public's right to recreate on Wisconsin's waterways are not significantly or unnecessarily impacted.

Upon review of the attached ordinance, we find it to be consistent with ss. 30.50 to 30.71 of the Wisconsin Statutes and the Department rules adopted to implement those sections. As outlined in s. 30.77(4), Wis. Stats., no ordinance is valid until it is prominently posted at all access points within your jurisdiction and until a signed copy is received by this office including proof of publication. The posting of local ordinances would only be required for those boating ordinances that are deemed more restrictive than state law.

Please contact me at (262)903-9399, should you have any questions regarding this review.

Sincerely,

*Jason Roberts*

Billings shall be done on a quarterly basis and shall include both the fixed charge and variable charge. 2. For customers having a sewage of excessive strength which the Village agrees to accept for treatment, a surcharge, in addition to the use charge based on flow quantity, shall be levied computed on the basis of the following formula:

$$S = V_s \times 8.34 (X \text{ 5OD-300})(a) + Y (SS = 300)(a)$$

Where:

- S = Surcharge in dollars
- V<sub>s</sub> = Sewage volume in million gallons
- 8.34 = Pounds per gallon of sewage
- X = Unit cost per pound for operation and maintenance attributable to BOD removal
- BOD = BOD strength in parts per million

**Project:** Sanitary Sewer Grouting – Twin Lakes, WI

Visu-Sewer is pleased to offer the following service:

Pressure grouting various joint leaks as identified within seven (7) different 8" mainline sewer pipe segments in the Village of Twin Lakes, WI. Visu-Sewer will provide all labor, equipment, and material to complete this project. Price assumes that the grout packer can traverse the entire pipe section. If needed, removal of obstructions (i.e. roots, protruding taps, mineral deposits, etc.) will be completed at the T&M rate below. Heavy cleaning will be priced separately if needed.

**Time & Material Rate:**

**Labor & Equip. - \$350.00 per hour (port-to-port)**

**Material - \$12.00 per gallon (AV-100 grout)**

(Estimate of (+/-) 40 hours and (+/-) 35 gallons of material)

**Note:** With decades of experience sealing leaks and rehabilitating collection systems, it is Visu-Sewer's experience that the most practical and economical way to remove infiltration is to test and seal every joint within a pipe segment or setup, rather than performing a complete setup for only one or two joints in that segment. Infiltration can and will migrate to surrounding joints if not sealed which would require more investment in the future, and not accomplish the goal of removing infiltration.

The Village of Twin Lakes shall provide access to all manholes, water from nearby hydrants without charge, a dumpsite for any captured debris, and traffic control beyond cones and signs. Actual mobilization, time on site, and material pumped will be billed upon completion. Thank you for the opportunity to quote this project. If you should have any questions please do not hesitate to contact me at 262-695-2340.

If a collapse of the original pipe results during the lining process, Visu-Sewer will not be held liable for costs associated with excavation, repairs or restoration.
